

# **Analogics adds Lumidigm biometric readers to its successful Hand Held terminal product line**

## **Lumidigm selects Analogics as its Sole distributor in India**

**India's largest Hand Held Terminal manufacturer adds Lumidigm's biometric sensors to its product line.**

**Analogics Tech India Ltd.** is now **Lumidigm's sole distributor in Indian sub continent.** Lumidigm's top performing and robust multispectral fingerprint technology is an ideal solution for all weather and rural / urban conditions in India.

"We are pleased to be Lumidigm's business partner in India," said Analogics M.D Mr. Surender Reddy. Analogics would be able to integrate the best finger print sensors into its widely popular Hand Held Computers, to meet the requirements of various users in India. The customers feel more comfortable with the local presence and support of the remarkable multispectral fingerprint sensor technology and products, in India.

**Mobile Hand Held biometrics** can bring identity management to remote areas, like banking to rural communities. Our superior multispectral imaging technology collects fingerprint images from the surface and subsurface features of the skin. This patented technology ensures that high quality images can be captured even when fingerprint ridges are hard to distinguish due to genetics, age, dirt, finger placement, or environmental conditions. Further, Lumidigm's technology provides protection against spoof attacks—attempts to dupe the sensor with fake fingerprints.

The products with integrated Lumidigm sensors will be deployed in prestigious national projects viz. Civil supplies, National ID projects, Rural banking, Financial inclusion, Voter ID, High Security zones, Attendance/access control etc.,

This business partnership has come at the perfect time and is generating several exciting opportunities for Lumidigm in India.

Matthew Ennis, Vice President of Business Development at Lumidigm, recently traveled to India to help promote the partnership.

### **About Lumidigm**

Lumidigm, Inc. deploys biometric systems that work quickly and effectively on all people in all environmental conditions. Headquartered in Albuquerque, New Mexico, USA. Lumidigm sensors are distributed worldwide. Lumidigm's corporate investors include Intel Capital, Methode Electronics, and Motorola Ventures. ,

### **About Analogics**

Analogics Tech India Ltd. delivers high quality and innovative products and services of global standards at affordable prices. Incorporated in 1994, Analogics has over 300 qualified Engineers/Technicians. \_
